- * JUMPING OFF POINT: A non-fixed starting range that can be adjusted up or down based on judging considerations, division norms and competition needs
- INDUSTRY AVERAGE: The common performance standard seen in competition
- · MEDIAN SCORE: The midpoint of the average-to-above-average scoring range where half the possible scores fall below and half above.
- . CONSIDERATIONS are listed in order of importance and are worked through from top to bottom.
- Note on DISMOUNTS Dismounts are difficult skills and should be rewarded in difficulty. Reminder the definition of a dismount is "dismount involves a release to a cradle or the performing surface where the top person lands on their feet".

COMPARATIVE SCORING PHILOSOPHY

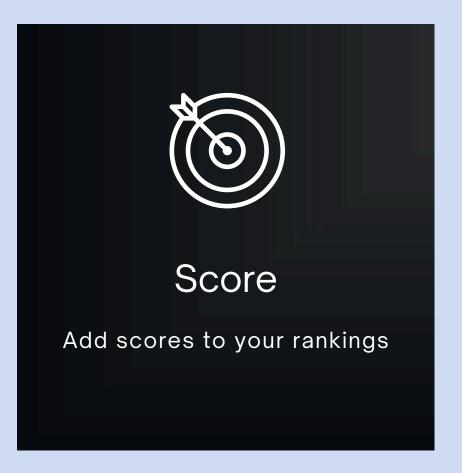

Goal: For better teams to score higher.

Compare teams to one another in the same division and against the level/division standard.

COMPARE

- Teams are ranked comparatively against other teams in the same division and against level standards.
- Judges have Jumping Off Points to help support accurate scoring of the first few teams
- What the "comparative scoring system" is not?
 - It is not a code of points.
 - It is not designed to give a certain skill a certain "worth"
